

# Happy Customers = More Business

## THE PURIFAN SYSTEM IS MORE THAN A SMOKE ELIMINATOR. IT'S A TOTAL AIR QUALITY CONTROL SYSTEM.

The Purifan System helps eliminate not only smoke, but cooking odors, dust, pollen, mold spores and a wide range of other irritants circulating in your place of business.

Our patented design uses an innovative four-stage filtration system that includes a pre-filter, 2 layers of charcoal filter and your choice of either a high-efficiency particulate air filter (HEPA filter) or a specially designed VOC filter (Volatile Organic Chemical) that adsorbs gases and chemical vapors that are not reactive with charcoal filters.

The Purifan System effectively circulates and recycles 2,000+ cubic feet of fresh air every minute! That means the air in a 20' X 20' room is completely circulated more than 40 times an hour.\* Compare that with other air cleaners on the market. Even the most expensive units move only a fraction of the volume of The Purifan System.

Installing the Purifan System will increase the overall air quality in your place of business making both customers and employees happy.

\*Based on average ceiling fan motor a minimum of 2,000 CFM

## For a fraction of the cost of alternative devices, here's one that really works!

"The smoke would just kind of sit in our smoking section. Over three or four years, we tried everything -- different fans, air cleaners, ionizers, didn't work. They did not do even 25% of what the Purifans do. We noticed the difference immediately -- the same day. Since we've put these in, we've gotten a lot of positive comments. People consider our place who wouldn't have before, absolutely. It's the best thing I know of right now on the market." - Paul Fleming, Owner The Beacon Restaurant, Wichita, KS

"... both my customers and my employees love the PuriFans... They not only handle smoke in the Cantinas, but eliminate lingering odors and dust particles in the dining areas.... Easy to clean and maintain." - Wm. L. "Bill" Riddle III, President, Valle Luna Mexican Restaurants & Cantinas, Phoenix

"(During) the big Rodeo-Chediski fire in North Eastern Arizona... I went to the Saloon and I could actually see smoke hanging in the air. I turned the Purifans on and in a few minutes the air was clear.... I do believe that the Purifan Systems accomplished what they were bought for, and that is clearing smoke out of the air. Reformed smokers are not complaining either." - Robert Adley Smith, Empty Pockets Saloon, Holbrook, AZ

"The First thing that I noticed after the Purifan filters were installed was clear sun beams coming through the window. Prior to having the Purifans, the only thing you could see was smoke and dust in the sunlight. With the Purifan filters, though, there was nothing in the air but clear sun light. That told me the whole room was clear!" - Denny Boley, Moose Lodge 144, Vandalia, IL
